

# FestUp your festival agenda

## How does FestUp help you?

FestUp is a mobile App that helps festival visitors plan and organize their next festival trip. Believing in the power of personalization, FestUp lets users build an own festival agenda.

### Schedule

Check your festival's schedule

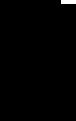

### Any Festival

Add any festival schedule to the App

### Now & Next

See who is playing now and next

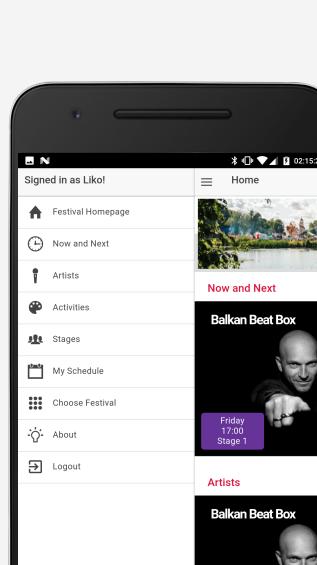

### Personalized Agenda

Add acts to your own agenda

## Plan your personal agenda

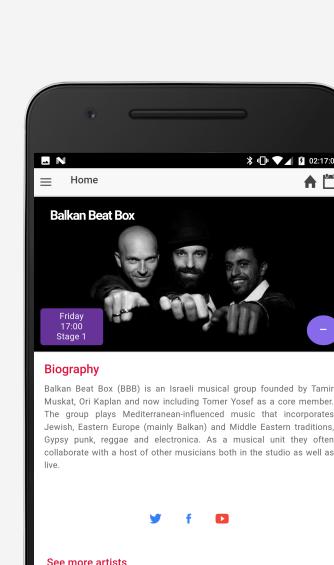

The new App

Which artist do you want to see?

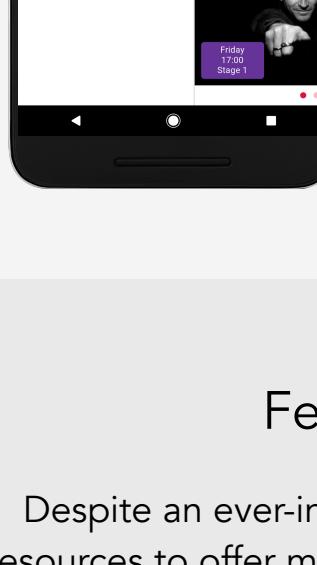

### Landing Page

Select a festival by clicking on its logo

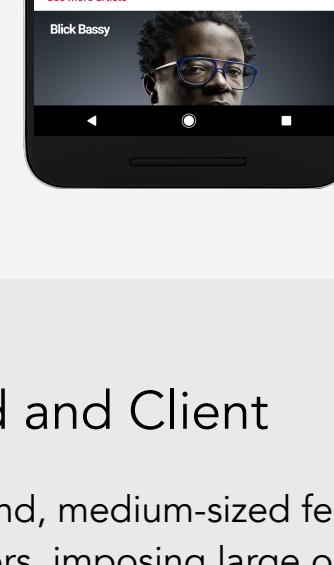

### Personal Schedule

Hit *plus* to add an artist. Hit *minus* to remove an artist.

### Menu

Navigate to any page

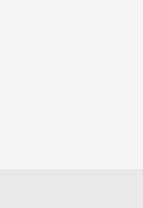

### Artist Profile

Check out what an artist can offer

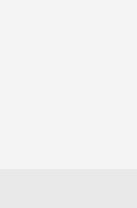

## FestUp Background and Client

Despite an ever-increasing technology trend, medium-sized festivals lack resources to offer mobile Apps to their visitors, imposing large organizational difficulties. In cooperation with University College London and our industry client - a London-based festival blogger - it was our aim to develop a Festival Scheduling App. A key goal was to develop a generic App that can be offered at a number of medium-sized festivals rather than at one specific event.
